Fresenius Medical Care

FRESENIUS MEDICAL CARE

Fresenius Medical Care is the world's largest integrated provider of products and services for individuals undergoing dialysis because of chronic kidney failure, a condition that affects more than 1.77 million individuals worldwide.

Fresenius Medical Care is also the world's leading provider of dialysis products such as hemodialysis machines, dialyzers and related disposable products. Fresenius Medical Care is listed on the Frankfurt Stock Exchange (FME, FME3) and the New York Stock Exchange (FMS, FMS/P).

WORLDLEADER IN DIALYSIS

CREATING A FUTURE WORTH LIVING. FOR PEOPLE. WORLDWIDE. EVERY DAY.

More than three decades of experience in dialysis, innovative research, the global leader in dialysis services and products – that is Fresenius Medical Care.

Patients with kidney disease can now look ahead with much more confidence thanks to our innovative technologies and treatment concepts.

We give them a future, one that offers them the best-possible quality of life.

We use the increasing demand for modern dialysis methods to our advantage and work consistently to enhance the Company's growth. Together with our employees, we focus on pursuing strategies that will enable us to uphold our technological leadership.

As a vertically integrated company, we offer products and services for the entire dialysis value chain.

The highest medical standards are our benchmark. This is our commitment to our patients, our partners in the healthcare system and our investors, who trust in the reliable performance and the future of Fresenius Medical Care.

DIALYSIS MARKET

End-stage renal disease (ESRD) has a global dimension. By the end of 2008, approximately 2.30 million patients received treatment for ESRD. Around 1.77 million patients in more than 145 countries on all continents received renal replacement therapy in the form of dialysis. Approximately 530,000 kidney patients live with a transplanted kidney.

Of the 1.77 million patients that underwent dialysis treatment by the end of 2008, 1.58 million were treated with hemodialysis and about 190,000 received peritoneal dialysis. In a global comparison of treatment methods, hemodialysis therefore clearly dominates. More than 89% of all dialysis patients were treated with this method in 2008.

The global dialysis market for both the provider and product business grew by approximately 5% to about \$65 billion in 2008. The market can be segmented into dialysis products accounting for around \$10.5 billion and dialysis services (including renal pharmaceuticals) valued at around \$55 billion.

PATIENTS – REGIONAL DEVELOPMENT

	2008	Change
North America	445,000	4–5%
U.S.	370,000	3–4%
Europe/Middle East/Africa	520,000	5–6%
